There are two methods for retrieving the Host name of computer:

1) Via EDSM Desktop Application:
   a. Double-click “EDSMInfo.exe” icon on desktop:

   ![Edsminfo.exe]

   b. The following Dialog box should display:

   ![EDSM Unicenter Information 2.5]

   c. The Host name is displayed as Computer Name. In the example above, the Host name is **AOC-623374-W1**

2) Via Windows Command Prompt:
   a. Click on the Windows “Start” button
   b. Select > Programs > Accessories > Command Prompt

   ![Windows Start Button and Command Prompt]

   ![Command Prompt Window]
c. Type “ipconfig/all” into the Command Prompt and press Enter

d. The HOST name will be listed at the top of the Command Prompt next to Host name. In the example above, the Host name is AOC-LNXM-TEST
